(a) the spectrum, CDM frame
(b) the same spectra, both frames
$D_\ell/D_{30}$ (shape, renormalised at $\ell = 30$)
multipole $\ell$
first peak $\ell \simeq 267$
CAMB $\ell \simeq 206$
CDM (Einstein-de Sitter)
ΛCDM
PLANCK_MODEL
CAMB — context (S4c)
CLASS — under CAMB, agreeing to 0.3%
one solve, frame chosen at the end
median frame gap up to 100%
CDM (Einstein-de Sitter) — CDM frame
CDM (Einstein-de Sitter) — Newtonian frame
ΛCDM — CDM frame
ΛCDM — Newtonian frame
PLANCK_MODEL — CDM frame
PLANCK_MODEL — Newtonian frame
